

REMARKS

Claims 41-57 and 74-82 were indicated to be allowed in the Office Action mailed March 6, 2007. However, in a subsequent action the Office raised a new issue by correctly noting that "SEQ ID NO:119" recited in claim 41 did not match the amino acid motif recited in the claim. Accordingly the claims were rejected as indefinite under 35 USC 112, first paragraph. The Office also asserted that the motif recited in claim 41 was not described in the specification, and accordingly rejected the claims as containing new matter.

Applicants have amended claim 41 to recite the correct sequence identifier (SEQ ID NO:352) and believe the rejection for indefiniteness is thereby overcome.

Applicants respectfully traverse the new matter rejection. The recited motif is found in the specification at least at page 24, line 23 of the specification as filed, which corresponds to page 23, line 23 of the substitute specification filed February 25, 2003 (dated "03-04-2003" in PAIR). For the convenience of the Office a portion of page 23 is reproduced below.

Applicants submit the claims are allowable and respectfully request that a Notice of Allowance be issued.
